

Softphone Audio Communication Device

USB Handset

CallComm softphones allow you to use this USB handset to speak and listen while on calls. The USB Handset is styled like a telephone handset however it is connected to the PC with a slim USB cable. Instead of using a headset, this allows you to handle VoIP calls in the manner of traditional telephones.

Benefits

- ✓ Plug and Play compatible with Windows USB 2.0/1.1
- ✓ Compact phone device powered from the PC
- ✓ USB quality full duplex, digital audio streams
